THE PRELIMINARY INVOCATION TO PRIMEUMATON

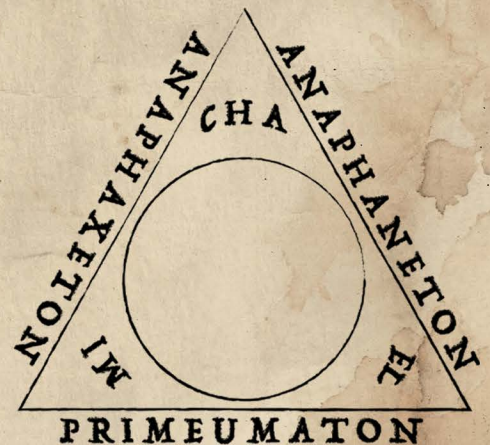

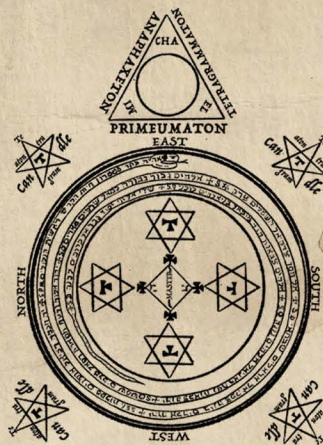

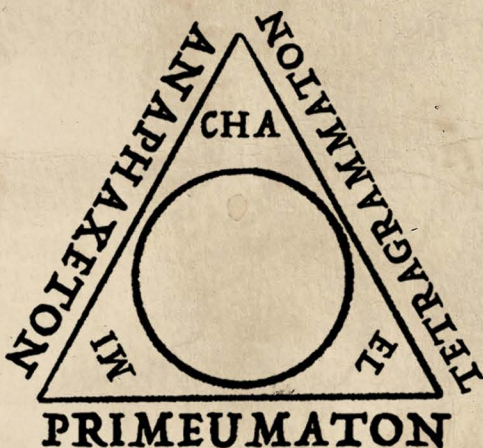

Primeumaton is Greek for "Thou Who Art the First and Last." The preliminary invocation prays for the protection of angels and Yahweh in the dangerous work of compelling demonic powers under their command.

The invocation begins with elaborate ceremonial preparations involving a sword, vessels for divination and conjuration, wax figures, scrolls written in blood, a ring, a ceremonial staff, special clothing, a garland, and careful timing according to arcane rules of astrology. Consult your grimoires for the most efficacious preparations.

Draw a Solomonick Triangle marked with the words

"ANAPHAXETON, ANAPHANETON, PRIMEUMATON"

in a protective circle, in an isolated, enclosed area.

Remain in the circle while reciting the invocation:

Delta Green Digital Assets: Esoterica Pack 2

This digital asset pack can assist you in creating physical and digital handouts for your Delta Green game. You will find all 72 demonic seals mentioned in *Delta Green: Impossible Landscapes*. I've included three versions of each seal for you to choose from. The first one is done with a rusty nib pen, the second is done with a fountain pen, and the third is a hybrid. The third version of each seal contains the demon's name, while the other two do not. This will allow you to reveal the name or not to your players. Each seal is in a separate named folder, which contain both PNG and WEBP versions of each seal. All seals and Solomonian Triangles in all three versions are included in the brushset for Procreate. Just download the brushset to the Files section of your iPad and drag and drop it into Procreate. For more info on the Solomonian Seals, check out www.DemonWeb101.com

I have also included a comprehensive selection of runes with and without an outline. These runes were created with an extra rusty nib pen. They are rough as if scrawled quickly into a notebook. I did not attempt to name the runes, as the name / sound of each can be different depending on the time in which they were created. They are numbered 1-70. "A" named runes are with the outline and "B" named runes are without the outline. Both versions of all 70 runes are also their own brushset for Procreate. You can read more about different types of runes and their history at: www.omniglot.com/writing/runic.htm
